

## Jiffy Steamers - Safest, Gentlest Wrinkle Remover

### Stop Ironing And Start Steaming!

Just one application of an iron causes fiber damage to your clothes. The more you iron the more you are decreasing the lifetime value of your clothes. Clothes are an investment, the longer you can wear them the more you get out of the money you spent on them. You wouldn't clean your car with steel wool would you? So why are you doing just that with your clothes! Just take a look at the images below. The first one is what the fibers in a T-shirt look like after **ONE** application from an iron. The second one is after one application from a steamer!

These images are from MVA Scientific Consultants PROVING that steaming is the safest and gentlest way to remove wrinkles from your clothes. The secret is steaming relaxes the fibers instead of crushing them like an iron does. Not only is it safer and gentler on fabric, it is quicker and easier!

**No more** having to setup and ironing board.

**No more** having to let the iron heat up for 15 minutes.

**No more** having to nudge and iron into corners and around buttons.

**No more** accidentally burning your clothes, or yourself!

Jiffy Steamers heat up and are ready to use within 2 minutes and come with a built in stand to hang your garments on.

The best thing about a jiffy steamer is you're not limited to only clothes! You can steam clothing, drapery, tablecloths, hats, upholstery, carpet and so much more. Virtually any fabric!

Jiffy Steamer is the oldest and largest manufacturer of garment steamers and steaming equipment for personal and professional use. They have been in business since 1940 providing customers just like you with high quality, easy to use steamers designed to make your clothes and fabrics look their best.
